The Mission of Keio University

"Keio University is not merely a place for academic pursuit. Its mission is to be a constant source of honorable character and a paragon of intellect and morals for the entire nation and for each member to apply this spirit to elucidate the essence of family, society, and nation. They will not only articulate this essence in words, but also demonstrate it in their actions, and by so doing make Keio a leader of society."

- Yukichi Fukuzawa, founder of Keio University, 1896

Keio Philosophy

「独立自尊」 – Dokuritsu Jison

Independence and Self-Respect

The basic spirit of Keio University is that of independence and self-respect, to protect the dignity of oneself and others and act with discretion and responsibility in every matter.

「実学」 – Jitsugaku

Science

Fukuzawa valued jitsugaku, which refers to science rather than short-sighted practical disciplines. Jitsugaku calls for individuals to solve issues by thinking critically from a scientific approach in order to reveal the empirical truth.

「半学半教」- Hangaku-hankyo

Learning while Teaching, Teaching while Learning

The principle of hangaku-hankyo unites Keio members and makes no distinction between pupil and teacher, between the learned and those just beginning to learn. From Keio's humble beginnings, there has been a spirit that students and teachers alike have the capacity to both teach and learn together.

「気品の泉源」 - Kihin no Sengen

Source of Honorable Character

Throughout his writings, Fukuzawa consistently emphasized the importance of a strong moral compass in addition to intellect in the pursuit of learning. One of Keio's educational objectives is to be a leader of character for society.

Keio at a Glance

*Keio by the Numbers as of June, 2023

Japan's first modern institution of higher learning

24 billion yen in scholarship funds

Dormitories

Total number of university students

International students at Keio

Total number of alumni

Recent honors for Keio

1st: Number of CEOs of companies listed on the Tokyo Stock Exchange

According to the 2023 University ranking (Asahi Shimbun Publications Inc.)

3rd: University Startups

According to the FY2022 survey on University-Developed Venture Businesses by METI (Ministry of Economy, Trade and Industry)

11th: Grants-in-Aid for Scientific Research

Under the AY2022 KAKENHI program, the largest competitive research funds scheme in Japan run by JSPS (Japan Society for the Promotion of Science)

Selected to be a part of the World **Premier International Research** Center Initiative (WPI) in 2022

As of April, 2023

Degree programs offered in English

Keio conducts about 1,000 classes in English and offers an increasing number of English-based degree programs.

Undergraduate

Faculty of Economics

PEARL (Programme in Economics for Alliances, Research and Leadership)

• Hiyoshi (1st year / 2nd year) • Mita (3rd year / 4th year)

Admission Quota : Approximately 100

Major : Economics

PEARL endeavors to foster the global leaders of tomorrow by offering a world-class education in advanced economics.

Faculty of Policy Management Faculty of Environment and Information Studies

GIGA (Global Information and Governance Academic) Program

Shonan Fujisawa

Admission Quota: 50

Major : Policy Management / Environment and Information Studies

The GIGA Program trains students to identify and resolve the complex issues of today by offering an education that integrates technology, science, design, and governance.

Graduate

Graduate School of Economics

Master's and Doctoral Programs

Mita

Admission Quota: Master's 70 / Doctoral 15

Major : Economics

Continuing in Keio's longstanding tradition of conducting outstanding research in economics and producing graduates to thrive at the forefront of economics and society.

Graduate School of Business and Commerce

Master's Program in Taxation Policy and Management

Mita

Admission Quota: 80

Major : Commerce

This program is designed to help increase the talent pool of those engaged in tax policy-making and tax administration, particularly in developing countries.

Graduate School of Medicine

Doctoral Program

• Shinanomachi

Admission Quota: 72

Major : Medical Science

Aiming to cultivate outstanding medical researchers and educators with a good knowledge of the humanities.

Graduate School of Science and Technology

International Graduate Programs on Advanced Science and Technology $[\ {\sf Master's}\ {\sf and}\ {\sf Doctoral}\]$

Yagami

Major : Fundamental Science and Technology / Integrated Design Engineering / Science for Open and Environmental Systems

Programs that enable students to cross boundaries between different fields of research and cover a wide breadth of advanced science.

Graduate

Graduate School of Media and Governance

Master's and Doctoral Programs

Shonan Fujisawa

Admission Quota: Master's 200 / Doctoral 50

Major : Media and Governance

Integrating technology and society through collaboration.

Graduate School of Health Management

Doctoral Program

Shonan Fujisawa

Admission Quota: 10

Major: Nursing / Public Health, Sport and Health Sciences

Leading quality improvement in medical treatment and care to bring health and wellbeing to everyone.

Graduate School of System Design and Management

Master's and Doctoral Programs

Hiyoshi

Admission Quota: Master's 77 / Doctoral 11

Major : System Design and Management

Designing and realizing technical and social systems for the next generation.

Graduate School of Media Design

Master's and Doctoral Programs

Hiyoshi

Admission Quota: Master's 80 / Doctoral 10

Major : Media Design

Educating the next "media innovators" - creative global leaders who can shape dream futures through disruptive creativity.

Law School

Master of Laws (LL.M.) in Global Legal Practice

Mita

Admission Quota : 30

Major : Global Legal Studies

Training legal professionals to usher in a new era of law for the 21st century.

Student Voices

Faculty of Economics (Undergraduate) PEARL (Programme in Economics for Alliances, Research and Leadership)

Leif Lincoln (United States)

I had never considered studying abroad until after taking a gap year, when I decided to pivot from a mathematics concentration in high school to pursue a long-time dream in cancer biology. Fueled by child-like wonder for neuroscience, and supportive parents who nudged me in the direction of Japanese innovation and scientific opportunities, I chose Keio SFC because I wanted

My professors and research mentors have presented me with endless opportunities to see the world differently, have shown me that I have the potential to solve global problems no matter my age or experience, and instilled in me a thirst to take on huge challenges. Reflecting now, I think it is fitting and romantic to conclude that fate brought me here, where I presently conduct research on neuron-glioma synapses in Glioblastoma multiforme, a rare type of brain cancer, at the Keio Institute for Advanced Biosciences in Tsuruoka, Yamagata.

other intellectual curiosities in fields outside of the life sciences.

My philosophy in life is to learn to live as I live to learn, and I encourage future Keio students, in chasing after lifelong dreams, that they remember to be humane in all of their pursuits. Taking calculated leaps of faith is healthy, even when the uncertainty of it all is frightening. You'll be surprised to see where life takes you, and often enough, you'll realize that it's where you needed to be in the first place!

Hiyoshi Campus marked both the commencement of my studies at Keio and the start of my university life. I would describe the atmosphere of Hiyoshi as a cultivator of self-discovery. It was this freedom that led me to discover and pursue a path in the fields of data science and finance. However, it was only after moving to Mita Campus from my third-year and having discovered my interests, that I began utilizing outlets to obtain in-depth knowledge and specialized skills in my topics of choice. Contributing to this was my participation in a 'Research Seminar' and an Independent Research Program. Through these opportunities, I enjoyed the freedom to indulge in furthering my specialty in my topic of interest through extended research, practical application, and vis-àvis mentorship. Between the inherent structuring of studies as well as supports available to those seeking depth of knowledge, students of the Faculty of Economics at Keio can remain confident that they will have the tools to find their calling and build expertise.

For future students, one important piece of advice that I would like to convey is that you are not just a student in Keio, but you are also a student in one of the largest cities in the world. There exist endless opportunities in Tokyo should you seek them. In conjunction with my academics, a consistent and early effort to connect with my environment and those around me helped in realizing my potential. The options available are far greater than those you may realize, so get out there and expand your horizons. This freedom unique to university life allowed me to explore and choose a path of my own creation, which is a privilege that I maximized as a university student in the metropolis of Tokyo.

Faculty of Environment and Information Studies (Undergraduate) GIGA (Global Information and Governance Academic) Program

Lianne Bianca Cagalingan (the Philippines)

Graduate School of Media Design (KMD) Master's Program

Ewa Szyszka (Poland)

Keio was my first choice, as I learned that the lab to which I currently belong could enable me to do truly interdisciplinary research in science and technology, while taking classes across various fields such as molecular biology, architecture, construction, and cosmology.

I am currently conducting research in haptic technology usability for underwater navigation. As part of my research I have connected with professional divers in Japan and Korea and obtained an advanced diving license myself. Also, the Keio diving club was an incredibly helpful connection when I was testing my diving technology. In the future I would like to work as part of an R&D department at a marine robotics company or as an Al researcher in cognitive decline prevention.

During my time at Keio I joined the powerlifting club and the Judo club. Participating in sport activities outside the classroom helped me to keep my mind sharp, stay active, and push my boundaries.

Attending university in a foreign country can be a challenging but rewarding experience. It is important to be open-minded, patient, and adaptable to new cultures, customs, and academic expectations. Given the fact that Japan is a very homogenous country you can expect that many people will treat you very differently, and in order to really feel that you fit in, you will need to fight for it every day, because it will not happen automatically. But remember, despite potential challenges, there are many opportunities to connect with people from diverse backgrounds and find your community at Keio.

Since I was a child, I have loved reading Japanese mystery novels and comics, which made me very interested in Japanese culture. Through the Japanese Language Program, I gradually came to the realization that I wanted to conduct research in Japan. As I knew that biological and medical research at Keio University are very advanced, I applied and became a member of a biology science lab.

Throughout my studies, I regularly discuss my research proposals and experiment results with my fellow lab members, especially my professor. Despite, at first, having limited Japanese language ability, I practiced presenting and received valuable feedback from other students. With the help of my peers, I was able to conduct experiments efficiently and present my findings at academic conferences. After graduating, I want to become a healthcare consultant and be able to use my specialized knowledge and Japanese language skills learned at Keio University to provide professional advice.

Outside of the lab, one memorable experience was that I had a chance to attend the Keio-Waseda baseball rivalry match, which was a thrilling experience as Keio was crowned the champion that year (2018). The university even held a victory parade all the way back from the baseball field to the main campus.

If you are interested in Japanese language or culture like me, you can meet many like-minded people from various countries. Although I was worried about my Japanese language ability at first, there is no need to worry because Keio offers a lot of English courses and opportunities to learn Japanese. I hope you will also enjoy your student life at Keio!

Graduate School of Science and Technology Doctoral Program

Lee Yeoujia (Taiwan)

Student Voices

Student Housing

List of dormitories for international students

Keio University offers international students a range of housing, which vary in location, cost, and terms and conditions. Since there is a set number of available rooms in the dormitories, not all applicants will be able to get a room if there are too many applications. Renting private accommodation is another option for students. As it is not common to share a room or a house in Japan, most students who choose to do so rent a single room. Please refer to the website below for further information about student housing.

https://www.ic.keio.ac.jp/en/life/housing/ryu_boshu.html

Dormitory	Accessible campuses	Japanese students are also residents	Meals included	Room types (single/unit)	Dormitory fees

Cost of living in Tokyo

Around 150 yen

Rent (one-room apartment) Around 70,000 yen

Train journey (base fare) Around 130 yen

There is no custom of tipping in Japan

Scholarships

An overview of scholarships for international students

For undergraduate students

Name of Insitution	Name of Scholarship	Amount	Duration	Eligibile Applicants
Keio University	Keio University Scholarship	500,000 yen or 250,000 yen for one year (paid in lump sum)	1 year (Students may apply every year)	2nd year and higher
	Keio University Degree Completion Scholarship	Within the amount of the academic fee and expenses (average 300,000 yen)	1 year	All years
	Yamaoka Kenichi Memorial Scholarship for first year undergraduate students	700,000 yen for one year (Letters, Economics, Law, Business and Commerce) 900,000 yen for one year (Medicine, Science and Technology, Policy Management, Environment and Information Studies, Nursing and Medical Care, Pharmacy)	1 year	1st year
	Yamaoka Kenichi Memorial Scholarship for undergraduate and graduate students	500,000 yen for one year (paid in lump sum)	1 year	2nd year and higher
	Goldman Sachs Scholars Fund	500,000 yen for one year (paid in lump sum)	1 year	All years
Japanese Government (Monbukagakusho: MEXT)	Japanese Government Scholarship under the Top Global University Project	Exemption from tuition fee 117,000 yen monthly	No more than 1 year	All years
Japan Student Services Organization (JASSO)	Monbukagakusho Honors Scholarship for Privately-Financed International Students (for Current Students) *Includes recipients for a six-month period	48,000 yen monthly	1 year (Students may apply every year)	All years
	Reservation Program for the Monbukagakusho Honors Scholarship for Privately-Financed International Students (for New Students) *Includes recipients for a six-month period	48,000 yen monthly	1 year	1st year
Awarding Entities (Private Entities, etc.)	Various scholarships	10,000 yen - 180,000 yen monthly		All years

As of April, 2023

For graduate students

Name of Insitution	Name of Scholarship	Amount	Duration	Eligibile Applicants
Keio University	"Design the Future" Award for International Students	Exemption from tuition fee 200,000 yen monthly A one-time preparation grant of 150,000 yen including subsidy for the air fare	2 years (Master's) 3 years (PhD)	Master's/ PhD
	Keio Graduate School Scholarship	500,000 yen for one year (paid in lump sum)	1 year (Students may apply every year)	Master's/ PhD
	Keio University Degree Completion Scholarship	Within the amount of the academic fee and expenses (average 300,000 yen)	1 year	Master's/ PhD
	Yamaoka Kenichi Memorial Scholarship for third-year doctoral students	Dissertation guidance fee	1 year	PhD
	Yamaoka Kenichi Memorial Scholarship for undergraduate and graduate students	500,000 yen for one year (paid in lump sum)	1 year	Master's/ PhD
	Goldman Sachs Scholars Fund	500,000 yen for one year (paid in lump sum)	1 year	Master's/ PhD
Japanese Government (Monbukagakusho: MEXT)	Japanese Government Scholarship under the Top Global University Project	Exemption from tuition fee 144,000 yen - 145,000 yen monthly	No more than 1 year	Master's/ PhD
Japan Student Services Organization (JASSO)	Monbukagakusho Honors Scholarship for Privately-Financed International Students (for Current Students) *Includes recipients for a six-month period	48,000 yen monthly	1 year (Students may apply every year)	Master's/ PhD

Alumni Stories

Graduate of the Graduate School of Economics

Juan Nelson Martínez Dahbura (El Salvador)

I came to Japan in 2011 as a MEXT scholar to pursue my graduate studies in Economics. I chose to apply to Keio's Graduate School of Economics because of its high academic quality and research environment. During my time as a graduate student at Keio I had the opportunity to meet and work with great economists from all over the world, and perform empirical research on Labor and Education Economics. I also worked as a part-time Research Assistant at the university, doing many coding and data-related tasks. This was especially impactful for me, as it made me realize how much I enjoyed programming, at a time when machine learning and "big data" were creating exciting new career options.

During the last years of my PhD I decided that I needed to polish my programming skills, so I found a part-time job as a software engineer in a company developing payments systems. I ended up working there full-time for a few years, even after I graduated from the PhD program. After learning a lot about software development, I changed jobs and became a R&D researcher at a large Japanese IT company. On my job I get to combine the intuition and methods from economics I acquired at Keio, tools from data science, and my engineering skills to develop new applications that people actually use to improve their productivity. I also get the opportunity to perform research in economics (I just presented at the American Economic Association Annual Meeting earlier this year!).

I am very thankful to Keio for the amazing research environment and the freedom which allowed me to forge the perfect career path for me. Keio has opened many doors for me, and I think it is a great place to pursue an academic career in Japan.

My career map

2012

Entered Keio's Graduate School of Economics, where I performed empirical research on education and labor economics and their connection to crime

2016

Got my first full-time job as a software engineer

2018

Graduated with a PhD in Economics

2019

Became an R&D researcher at my current job

Goal in 5 years

I want to start my own IT company in Japan

Graduate of the Graduate School of Science and Technology

Iza Husna Mohamad Hashim (Malaysia)

After graduating from high school, I participated in a study abroad program sponsored by the Malaysian government. I chose to study at Keio University because it is a well-known university that provides students with opportunities to engage in cutting-edge research and has a strong reputation among employers. I was also attracted to the history of the university and the philosophy of the founder, Yukichi Fukuzawa.

At Keio University, the professors are very helpful and kind and helped me understand the academics although there was a huge language barrier as I had just started learning Japanese. The environment at the university that I found really inspiring is "Hangaku-hankyo (Learning while Teaching, Teaching while Learning)" where the professors and students both teach and learn together to achieve their goals.

While studying at Keio University, I had the opportunity to conduct research and do an internship at a Japanese manufacturing company. These were valuable experiences that nurtured my interest in the manufacturing industry. Now, I am working on delivering solutions to speed up digital transformation—to help to improve productivity, efficiency, and quality—especially for Japanese manufacturing companies.

For those who are seeking opportunities to study in Japan, do research the university that is the best fit for your interests and goals as the universities in Japan have their own strengths and areas of focus. Studying in Japan can be a life-changing experience that opens up new opportunities and perspectives. Last but not least, embrace the challenges, take full advantage of the opportunities, and enjoy the journey!

My career map

2011

Entered Keio University's Faculty of Science and Technology Major in Mechanical Engineering

2013

Joined the Global Environmental System Leaders Program offered by Keio

2018

After graduating I joined a Japanese consulting company Worked as a system software engineer

2021

Joined a global software company in Japan Working as a consultant helping customers design and implement new or improved solutions

Goal in 5 years

Lead projects and continue to deliver the best solutions

Mita-kai Alumni Network

Alumni of Keio university are called "Jukuin." Most of the 400,000 alumni of our university continue to hold dear the bonds they have formed at Keio.

Mita-kai are independent, volunteer-run groups which bring together Keio alumni. Mita-kai take the form of clubs, societies, and seminars arranged around different themes, such as the yearly Mita-kai open to those graduating from Keio in a particular academic year, and the regional Mita-kai established in various regions in Japan and abroad. There are also Mita-kai by place or industry of employment for those in particular corporations or fields.

There are around 880 Mita-kai in Japan and around 70 overseas. They are a platform for exchange and continued friendship among Keio alumni. Jukuin throughout the globe get together and engage in a variety of activities, including supporting the students currently charting their way in various fields.
