

When a person close to you tests positive for COVID-19, or when you are contacted by someone who tested positive (undergraduate and graduate students)

Find out the date that the person became symptomatic for COVID-19 (the date they underwent the test that returned positive)

Does the person who tested positive live with you?

YES

You are considered a "close contact"*

YES

Do either of the following two things apply to you?

- I met with the person who tested positive less than two days before they developed symptoms
- I met with this person in a situation that puts me at risk of infection

Someone with whom you ate or drank together, were within 1 meter of while not wearing a mask, spent an extended period together in close quarters (karaoke, driving, etc.), spent a long time together in a face-to-face situation (playing board games, mahjong, etc.)

NO

Do you have the any of the following symptoms?
Are you experiencing any symptoms such as a fever, cough, sore throat, headache, fatigue, difficulty breathing, loss of smell or taste, or other symptoms indicative of a COVID-19?

NO

Please self-quarantine
(For seven days starting the day after meeting the person who tested positive)**

- Please visit the Keio University Health Center website and submit the COVID-19 self-quarantine report

YES

Please self-quarantine
(For seven days starting the day after meeting the person who tested positive)**

- Please visit the Keio University Health Center website and submit the COVID-19 self-quarantine report
- Consult with your primary care provider or a medical institution that is prepared to care for close contacts (be sure to contact them and inquire in advance)

Do you have the any of the following symptoms?
Are you experiencing any symptoms such as a fever, cough, sore throat, headache, fatigue, difficulty breathing, loss of smell or taste, or other symptoms indicative of a COVID-19?

NO

YES

NO

You are not considered a close contact
No action required at present. Please continue to follow infection control guidelines

* In light of the high transmissibility of the Omicron variant, the Keio University Infection Response Center for COVID-19 has established criterion for those "considered to be close contacts," and asks Keio students to self-quarantine in order to prevent the spread of infections.

** The period close contacts must self-quarantine is subject to change by the government. Please follow the most recent guidelines. Keio University Infection Response Center for COVID-19
