# KOSMOS: Library Catalog

The screenshot shows the KOSMOS library catalog homepage. At the top left is the Keio University logo and the text "慶應義塾大学 KOSMOS Keio University". Navigation links include "NEW SEARCH", "JOURNAL SEARCH", "DATABASE", "LIBRARY HOME", "ILL REQUEST", and "FETCH ITEM". On the right, there are icons for a refresh button, a pushpin, and a "Sign in" button, along with a "Menu" dropdown. The main search area features a search bar with the placeholder "Search anything". Below the search bar are filters: "All items", "that contain my query words", and "anywhere in the record". A dropdown menu is open, showing options: "Library Catalog and E-Resources" (highlighted with a red circle), "Articles", "Library Catalog (Keio & Waseda)", "Everything", and "Limited Search". To the right of the search bar is an "ADVANCED SEARCH" button with a magnifying glass icon (also highlighted with a red circle). A yellow banner below the search area says "Sign in to get complete results and to request items". A vertical "HELP ?" button is on the far right.

The screenshot shows the KOSMOS library catalog search results page. The search bar contains the query "carbon nanotube\*" and is highlighted with a red dashed border. The search filters are set to "Library Catalog and E-Resources" and "All". The "ADVANCED SEARCH" button is also highlighted with a red dashed border. Below the search bar, there are filters: "All items", "that contain my query words", and "anywhere in the record". A grey banner below the filters says "You can expand your results including journal articles and more with 'Everything' searchslot option." At the bottom, a yellow banner says "Sign in to get complete results and to request items" with a "Sign in" button and a "DISMISS" button. A vertical "HELP ?" button is on the far right.

# Searching by KOSMOS

The screenshot shows a library search interface. At the top, a search bar contains the query "carbon nanotube\*" with a search icon and the text "Library Catalog and E-Resources" and "All". To the right is an "ADVANCED SEARCH" link. Below the search bar are filters: "All items", "that contain my query words", and "anywhere in the record". A message states: "You can expand your results including journal articles and more with 'Everything!' searchslot option." A yellow banner prompts the user to "Sign in to get complete results and to request items" with "Sign in" and "DISMISS" options. A "HELP ?" button is visible on the right. The main results area shows "0 selected" and "PAGE 1 1-10 of 1,723 Results". On the left, a sidebar titled "Tweak your results" includes sections for "Availability" (Available online, Held by library, Peer-reviewed Journals, Open Access), "Library" (RIKOGAKU Media Center (15), MITA Media Center (1)), and "Resource Type" (Books (1,540), Conference Proceedings (171)). The search results list three items:

CHAPTER THREE

### METHODOLOGICAL CONSIDERATIONS IN CONTEMPORARY ECONOMICS

Exponents in the social sciences are sometimes confused with the idea that their discipline is not a science. Human behavior, in fact, cannot be studied with the same objectivity as the behavior of atoms and molecules. Value judgments, philosophy of government, and ideological biases inevitably interfere with the attempt to derive conclusions that are independent of the particular viewpoint espoused. Moreover, there is no reliable laboratory check comparable with that of physics.

In empirical economics we want to distinguish between "positive economics" and "normative economics." Positive economics deals with established facts (if better producers are paid a salary, will the price of business contracts rise? Will a tax on sugar in the domestic market reduce the employment of unskilled workers? Will the distribution of income improve a country's balance of payments? How can foreign aid be used to promote economic growth? etc.). Normative economics, on the other hand, is concerned with value judgments that are not questions of fact or of the behavior of people and the other things that the good or bad results are considered to be. What should be done? Should the price of gas be raised? Should the rate of interest be lowered? Should a tax on cigarettes be introduced? Should there be legislation to limit the amount of foreign investment?

Recent positive economists are greatly indebted to the judgments of value in making their value judgments. This is not to say that most of the interesting economic propositions involve the addition of value judgments to judgments on a body of established facts. But thoughtful economists take the value judgments of the questions that economic investigations are made that are not purely empirical as a field with established
