The Keio Unicorns

The two gargoyle-like creatures with single horns that appear on the front cover are known as the Keio Unicorns. They were actual statues that resided on Keio’s Mita Campus in the first half of the 20th century. The original sculptures were damaged during the war, but one was repaired and the other was replicated, and the pair now stand watch at the entrance of a Keio-affiliated junior high school.
About Keio University

Founded in Tokyo in 1858 by Yukichi Fukuzawa, a visionary and intellectual leader, Keio University is the first modern institution of higher learning in Japan. The university has been guided by an unshakeable philosophy of nurturing individuals who can think for themselves and apply profound knowledge and unconventional wisdom to better society.

Learn, Live, Lead.

Today, the university has grown and is spread over 6 campuses, but Mita Campus, established in the heart of Tokyo by Fukuzawa himself, is still Keio’s headquarters and spiritual home.

Keio’s graduates are playing a leading part throughout the public and private sectors, both inside and outside of Japan: business and finance, legal, medical, education and research, government and politics, arts and sports, and more.

Keio is resilient to the changing social structure due to factors such as globalization, population aging, advancements in IT, and environmental changes.

Most of all, Keio University is committed to being an engaged and truly trusted university and to contributing to the global and local societies through high-quality education, research, and medicine, now and in the future.
Today, Keio University is a comprehensive research-intensive university with 10 undergraduate faculties and 14 graduate schools.

10 Undergraduate Faculties
Letters, Economics, Law (including Political Science), Business and Commerce, Medicine, Science and Technology, Policy Management, Environment and Information Studies, Nursing and Medical Care, and Pharmacy

14 Graduate Schools
Letters, Economics, Law (including Political Science), Human Relations, Business and Commerce, Medicine, Science and Technology, Media and Governance, Health Management, Pharmaceutical Sciences, Business Administration, System Design and Management, Media Design, and Law School

As part of its internationalization efforts, Keio offers an ever-increasing number of programs and courses conducted in English, including:

29 Double Degree Programs
24 Degree Programs
800 Courses

As of March 2018
Students

Keio has over 33,500 students in degree programs, of which over 85% are undergraduate students. About 75% of undergraduate students study social sciences and humanities, while at the graduate level, about 60% of students major in fields related to science and technology and medicine.

In AY 2017, Keio had a total of 1,677 international students from over 70 countries, including those enrolled in the Student Exchange Program, the Japanese Language Program, short-term programs, and research programs. The number of Japanese students studying abroad reached 1,405 in AY 2016.

Global Challenges and Keio’s Initiatives

In 2014, Keio was selected as one of the 13 Top Type [Type A] research universities for the Top Global University Project by the government. The project aims to bolster the international competitiveness of Japanese higher education by providing priority support to universities dedicated to thorough internationalization and university reform.

Keio created the 3 research and education initiatives of Longevity, Security, and Creativity as its own Global Initiatives to address global issues Japan will be facing in the very near feature, which include an aging population; increased risks to environmental, economic, and regional security; and high demand for innovation.

In November 2016, Keio established the Keio University Global Research Institute (KGRI) to showcase and facilitate interdisciplinary research under the 3 initiatives.
Research at Keio

1st among Japanese private universities (11th overall)

In FY 2017, Keio University received 3.2 billion yen in Grants-in-Aid for Scientific Research—the largest competitive research fund provided by the Japan Society for the Promotion of Science (JSPS)—making Keio first among private universities and 11th overall.

5th in Japan for research funding from private corporations

In FY 2016, Keio University received 4.5 billion yen in research funds from private corporations. Keio also placed 5th in Japan for funding from the private sector for joint and commissioned research, according to a report by MEXT (Ministry of Education, Culture, Sports, Science and Technology).

Keio has university-wide Comprehensive Partnership Agreements with Hitachi, JAXA, NTT, and Riken.

The Keio Innovation Initiative (KII), a venture capital fund dedicated to innovation with 4.5 billion yen at their disposal, was established to help develop new industries based on leading-edge research findings.

40+ research institutes and advanced research facilities (24 overseas research hubs)

As of May 2018, Keio has over 40 research institutes and advanced research facilities in Japan and also collaborates with 24 joint research hubs located at overseas partner universities and institutions. Keio has also invested more in its libraries than any other Japanese university and has 5.1 million books in its collection.
Research and Innovation — Keio’s Town Campus Collaborations

The Institute for Advanced Biosciences (IAB) at the Tsuruoka Town Campus of Keio (TTCK) uses biotechnologies to comprehensively measure and analyze human and micro-organic cellular activity, conduct computer analyses and simulations, and apply the findings to medical, environmental, and food sciences.

In July 2017, a team of researchers from the IAB and the University of Edinburgh carefully stitched together the DNA code for 2 species of tardigrade (also known as “water bears” or “moss piglets”) to reveal their origins and the genes that underlie their extraordinary ability to survive in extreme conditions.

Keio University opened its Tonomachi Town Campus in April 2016 at Kawasaki King Skyfront, an innovation hub in Kawasaki that connects corporate and academic partners throughout science and industry. Tonomochi Town Campus will serve as a core facility to promote innovative transdisciplinary research under the Keio Longevity Initiative as well as wellbeing research under initiatives by the Japan Science and Technology Agency (JST).
The lifelong bonds and sense of solidarity between alumni, as well as the strong connection between alumni and the university, are distinctive features and a source of great pride for Keio University. This strong network among the graduates, best embodied by the numerous alumni organizations known as Mita-kai, is part of what makes Keio truly unique.

Employability

With many Keio alumni holding distinguished positions in all sectors of society, Keio enjoys a good reputation for employability. Keio is an exciting place to learn, grow, and connect with people from around the world. Learn from leading scholars, conduct advanced research, and connect with leaders from academia, business, and government—Keio can help every student launch their career.

Keio’s graduates are active in every sector of society

As of April 30, 2017 according to data provided by graduates.
"Other" includes but is not limited to the following industries: education and learning support; electricity, gas, heat supply and water; accommodation, eating and drinking services; and agriculture, forestry, fisheries, and mining.
Keio University has 6 major campuses across the greater Tokyo area, along with 9 affiliated schools for elementary and secondary education.

There is also the Keio Academy of New York, a bilingual high school in Purchase, New York that is recognized by the University of the State of New York as an independent secondary school.

In addition, Keio operates several Town Campuses, of which 3 focus on research and innovation: Tsuruoka Town Campus of Keio [TTCK] in Tsuruoka City, Yamagata Prefecture and Shin-Kawasaki Town Campus (K-square) and Tonomachi Town Campus, both in Kawasaki City, Kanagawa Prefecture.
Campus Investment

The Old University Library

The iconic Old University Library on Mita Campus was built in 1912 to commemorate the 50th anniversary of Keio University. This graceful brick building, which turned 100 in 2012, is beloved not only by those associated with Keio but also by many others. To ensure that this building, which is a designated Important Cultural Property of Japan, stands for another century and has a strong presence in the minds of future generations of Keio graduates, it has been under major renovation since February 2017. Work includes improvement of earthquake resiliency and conservation and restoration work on the interior and exterior of the building and the building is scheduled to be reopened in May 2019.

Hiyoshi Commemorative Hall

Hiyoshi Commemorative Hall was originally built in 1958 to commemorate the 100th anniversary of the establishment of Keio University. Currently being rebuilt after more than 60 years of use, the building is used for entrance and commencement ceremonies, student and alumni events, physical education classes, and activities of the Keio University Athletic Association. The new building, which is due to be completed in 2020, will have five floors above ground and one below, and a greatly increased seating capacity of around 10,000 people. The hall will also house an enlarged and improved arena, expanding the use of the building to include an indoor sports facility. This indoor sports facility is planned to be used by the British Olympic and Paralympic Teams’ preparation camp, which Keio will be hosting.

A New University Hospital

To celebrate the 100th anniversary of the establishment of the School of Medicine in 2017, the Keio University Hospital, which is accredited as one of the 11 Core Clinical Research Hospitals in Japan, unveiled a new hospital building in the spring of 2018. The building will serve as an unparalleled center for medical research and medical care, allowing Keio to remain committed to developing the world’s safest and most advanced medical technologies, as well as to effectively cater to the complex medical needs of a rapidly aging society.

Tsunashima SST International Dormitory

Keio University’s Tsunashima SST [Sustainable Smart Town] International Dormitory, which is located within Tsunashima SST in Yokohama, opened in March 2018. This coincided with the completion and grand opening of Tsunashima SST, a next-generation urban smart town. The international dormitory has 163 single rooms for both international and Japanese students. The facility also boasts an open space on the top floor for student activities, to encourage interaction among dormitory residents as well as an exchange studio on the first floor that is planned to be used for collaborative research between Keio and the local community.
In the lead-up to the Tokyo 2020 Olympic Games, the British Olympic Association (Team GB) and the British Paralympic Association (ParalympicsGB) will be using the sports facilities at Keio University’s Hiyoshi Campus. Facilities that will be made available to Team GB include the Hiyoshi Commemorative Hall, Athletics Field, and the Mamushidani Gymnasium, and currently, Team GB are planning to use the university’s facilities for the following sports:

- Archery
- Fencing
- Modern Pentathlon
- Badminton
- Gymnastics
- Table Tennis
- Basketball
- Judo
- Taekwondo
- Boxing
- Weightlifting
- Karate
- Field Hockey

(As of March 31, 2018)

In addition to sports, the university will also work to deepen exchange with the UK in research, education, history, culture, and art. Through these activities, Keio aims to make positive contributions to the local, regional, and international communities.
For the year ending on March 31, 2018, Keio had an annual budget of about 154 billion yen

Of the total revenue, about one-third comes from tuition and other fees, another third from medical services, and the remaining from government subsidies, gifts and donations, investments, etc. Keio has a scholarship fund of about 24 billion yen.

Mita — At the Heart of Tokyo

Keio’s Spiritual Home

Keio is located in the Greater Tokyo Area, one of the world’s largest major metropolitan areas. Mita Campus, Keio’s headquarters and spiritual home, is located at the heart of Tokyo, a city with many contrasting faces: unique customs, natural beauty, history, and futuristic technology.

And although the city is one of the most populous in the world, Tokyo is scattered with historic temples, shrines and gardens, and green spaces. What’s more, with all of the modern trappings and conveniences of a modern city, Tokyo is consistently ranked among the top cities to live in and study by various publications, including 2nd place on the 2018 QS Best Student Cities Ranking. Tokyo is also a convenient gateway to all of Japan and the rest of Asia.

Mita Campus

The campus is home to:

Old Library
Elegant Neo-Gothic building representative of Meiji-era architecture; a designated Important Cultural Property of Japan

Mita Enzetsu-kan
Mita Public Speaking Hall; first public speaking hall in Japan; a designated Important Cultural Property of Japan

Ex-Noguchi Room
Excellent example of post-war architecture and interior design by world-renowned sculptor Isamu Noguchi (1904-1988)
