Laugh, learn and spread your wings with peers from throughout the globe.
Packed with stimulation and things to look forward to, your time at Keio University will
pave the way to you maximizing your future potential and broadening your horizons on
the global stage.

Welcome to Keio!
What's Keio?

From a modestly-sized institution of higher education which supported Japan’s modernization to one of the foremost research universities globally

Yukichi Fukuzawa, a self-made entrepreneur opened a school of Dutch studies for scholarship with an international perspective in Edo-period Tokyo (1858) to foster individuals with the ability to take responsibility for their own learning by thinking for themselves and remaining unswayed by the changes of the era. This was the starting point of Keio University.

A place of learning which blossomed on the ideals of self-respect and independence of mind and then turned its gaze to the world beyond

Fukuzawa, whose keen sense of the necessity to modernize Japan’s education system was inspired by his travels in Europe and the United States, pioneered the establishment of an educational environment founded on a spirit of practical science which he christened jitsugaku. In this way, Keio University became the epoch-making institution which lit the way forward for Japan some 160 years ago, proposing perspectives which encouraged the “scientific thinking” that would become foundational to the modern global society.

The wellspring of jitsugaku, the “spirit of practical science,” in Japan

Hangaku hankyo - producing leaders who have supported modernization in a multitude of fields through human bonds created in a spirit of mutual teaching and learning between teachers and pupils

The fair and egalitarian ideal of hangaku hankyo, which emphasizes having no essential distance between teachers and students and merely distinguishes between “those who have learned” and “those who have yet to learn,” has helped produce many leaders in every field of human endeavor, with an emphasis on those in industry. It has facilitated massive contributions to Japan’s modernization.

A research university engaged in finding solutions to global-level problems by mobilizing the philosophy of jiga sakko: “creating history to define the future”

Jiga sakko is an expression which captures the essence of a fearless commitment to engage with new domains and unexplored fields in order to both create new precedents and reveal new ways forward. As one of the foremost research universities in Japan, which has expanded to include 10 undergraduate faculties and 14 graduate schools, Keio remains locked in daily battle with challenges in education, research, and medicine to solve global-scale problems.

Keio’s Assets

Keio University: Japan’s era-leading and oldest private university. Scholarship which has always kept an eye on the global outlook.

Over 370,000 alumni active on the world stage in every field and discipline. The powerful bonds and strong networks among fellow alumni are Keio’s greatest assets.

One of the most consistently highly-rated universities among employers, Keio University achieved 9th place worldwide in the Times Higher Education’s Alma Mater Index: Global Executives 2013 which ranks universities according to the number of graduates going on to become CEOs of top global companies.

*Times Higher Education’s Alma Mater Index: Global Executives 2013

Keio University was selected for the Japanese government’s Top Global University Project as a Top Type (Type A) leading Japanese university conducting global-level research and education

1st: Grants-in-Aid for Scientific Research (private university)
Recipient of governmental research funding of over 3.2 billion yen, the largest scale funding for a private university in Japan (AY 2016).

1st: Number of female faculty members
279 full-time female faculty members, the highest number of any university in Japan (AY 2016).

1st: Certified public accountant and bar examinations
Keio placed first for the number of students or graduates passing the certified public accountant examination and bar examination with 157 and 144 persons passing each respectively in AY 2017.

1st: CEOs of companies listed on the Tokyo Stock Exchange
Ranked first in Japan with 180 of the CEOs of companies listed on the First Section of the Tokyo Stock Exchange having graduated from Keio (April 2018).

1st: Japanese private university, World University Rankings
Keio captured the top spot in the QS World University Rankings 2019 for Japanese private universities.

1st: Japanese private university, Japan University Rankings

Top Global University Project

Keio University was selected for the Japanese government’s Top Global University Project as a Top Type (Type A) leading Japanese university conducting global-level research and education

Longevity
Initiative to realize a society where people live better, longer lives

Security
Initiative to ensure a safer, more sustainable society

Creativity
Initiative to create innovation in education and research

Integrative Approaches

What’s Keio?
Unique traditions and the abundant natural scenes of the four seasons coexist in harmony with cutting-edge technologies shaping the future. Keio University can be found in a prime location in the singular global megalopolis of Tokyo, which was chosen as the second best city in the world as a location for overseas study in the QS Best Student Cities Ranking 2018. This is a city to which young people are inexorably drawn and a place where information and trends are created and spread. Traditional events such as festivals go hand-in-hand with burgeoning cultural trends and happenings. It is also a place where you will encounter generous and warm-hearted people. This is topped off by an enchanting food scene. Culinary traditions from throughout the world come together in Tokyo, with pride of place being taken up by Japanese washoku cuisine, now registered as a UNESCO intangible cultural property. Among the many surprises which surely await you here are one of the busiest intersections in the world where up to 3,000 people can cross at any one time, and a network of train lines which has all the appearance of a labyrinth. Studying at Keio means living in Tokyo. Now is the time to experience your fill of Tokyo’s many charms.
Tokyo is currently in the global spotlight as the venue for the upcoming 2020 Olympic and Paralympic Games. A constant stream of people from every country in the world, endless stimulation, and boundless progress: One can only wonder what limitless possibilities lie in wait for you in Tokyo, and the lessons this city beating at the heart of the world will impart. Keio’s Hiyoshi Campus will host the British Olympic and Paralympic team’s preparation camps*. You too will have the chance to take part in this global carnival. The time is right for you to join us in creating Tokyo and the year 2020 during this “once in a lifetime” opportunity.

*hosted competitions TBC
Support, Unite, Deliver.
The student-led KEIO 2020 Project for volunteer supporters of the British Olympic and Paralympic teams. Support the athletes, unite the team, the region, and Keio as one, and deliver the spirit of omotenashi hospitality to move the competitors’ hearts. Based on these three major principles, the participants in the KEIO 2020 Project are engaged in preparations towards 2020. Through hands-on experience, with an emphasis on sports volunteer activities, they are meanwhile learning to communicate with the athletes, as well as learning about the spirit of the competition, culture, and organizational structures.

Our activities will live on in the history books.
Part of the exquisite thrill of this project is the high degree of wriggle room and potential available. There is also a broad scope in the different threads of these activities - taking in sports, internationalization, diversity, and regional exchange. Within this context, activities will achieve their ultimate shape and new values will be generated by adding the “external perspective on Japan” provided by students from overseas. We encourage students from overseas coming to Japan to take advantage of this unique opportunity and join Keio University in cheering on Team GB and ParalympicsGB, and helping to make the campus an ever more exciting place to be.
A familiar and broad network that elevates your research

After studying at the École Centrale de Lille for two years, I enrolled in the master’s program at Keio University for two years through a double degree program. I chose to study in Japan because I wanted to study outside Europe and in a non-English-speaking country, and I was very interested in studying in a new environment with a completely different culture. I was highly motivated to go to Japan, which I think was a factor that helped me pass the difficult selection process. Here at Keio, the students are close with the professors and there is a family-like bond between everyone in the laboratory. I am good friends with the other students in my laboratory and we have fun together every day. I hope to continue studying here for at least three more years to get my PhD. Because of Keio’s broad network, my own network has also expanded, and as a result, I believe that my research will develop into something more meaningful.

Growth through tea ceremony

I chose to study at Keio University because of the all-English programs and because I could get a scholarship. In addition, I was particularly interested in studying at Shonan Fujisawa Campus (SFC) where I heard from a senior student that the professors there, some who are well-known, are truly passionate teachers. I was able to apply to the program from overseas and I think it’s great how you can submit a self-introductory video instead of an interview. This helped me properly convey my thoughts and enthusiasm for wanting to study at SFC.

I am making progress with my research in my major field, architecture, and I am learning a lot in the tea ceremony club. In the beginning, I couldn’t speak any Japanese, but with the help of my friends, by the time of the university festival, I was able to serve tea to the guests. Now, I am looking forward to getting a tea ceremony qualification, which can be gotten after practicing it for four years. At Keio, you have to be proactive and find opportunities for yourself. However, by doing this, you will meet so many different people and I think these are the most valuable life experiences.

An environment where you can devote yourself to learning to enjoy life

In the PEARL programme where you can learn economics in English, there is an excellent learning environment in which professors and small groups of students share opinions and have frequent discussions on various topics. I have set my own curriculum and I make sure that I have free time to join in club activities and do part-time work, giving me an active and balanced life both on and off campus. I’m surrounded by Japanese students, international students, junior students, and of course, professors, and it’s very meaningful to interact with people from different countries and of different ages.

Keio University has a diverse international color and is highly regarded worldwide, and I’m sure that my experiences here will pave the way for my future success. For me, my goals are to live abroad and to work in an area related to the automotive industry, and I know that what I learn here will serve me well, all the while having the time of my life.

Aiming to be a physician-scientist with world-class clinical experience

While studying clinical medicine for seven years in China, I saw many patients suffering from incurable illnesses. I decided to major in pathology, the field that bridges basic and clinical medicine, to deepen my knowledge of cancer. After looking into the integrated basic and clinical medicine and medical care programs at some universities, I decided to enter Keio University because the program at Keio’s Graduate School of Medicine was the most interesting to me and offered everything I was looking for. I got good results from the research project I carried out over the past two years and these were well-received when I presented the outcomes at the Annual Meeting of the Japanese Cancer Association. I am continuing my research with the goal of becoming a physician-scientist in Japan. I learned that what is important is to first figure out what you want to do in the future and what you need to study to get there.

The Keio University Hospital is in central Tokyo, and in fact is very close to the main venue for the Tokyo 2020 Olympics and Paralympics. Just like the athletes who will come from all over the world to chase their dreams, my fellow students and I are also singularly focused on our goals.

Programs for Developing Global Leaders

Developing an environment for education and research conducted in English is an important endeavor at Keio to make the university more accessible to students from abroad. There are currently over 800 courses delivered in English throughout the university, in addition to English as a foreign language classes. We have degree programs delivered in English at 3 undergraduate faculties and 9 graduate schools.

International Programs at Keio University to cultivate the global leaders of the future

Degree Programs Offered in English

- **Economics**
  - M.A.R. (Programme in Economics for Alliances, Research and Leadership)
  - Dual M.A.R./M.Sc. (International Advanced Degrees Course)
  - M.A.R. in Environmental Innovators Course
  - M.A.R. in Global Environmental System Leaders Course

- **Policy Management Environment and Information Studies**
  - GIGA (Global Information and Governance Academics) Program

- **System Design and Management**
  - System Design and Management Course

- **Health Management**
  - Doctoral Program

- **Media and Technology**
  - International Graduate Programs on Advanced Science and Technology
  - Global Environmental System Leaders Course

- **Economics**
  - M.A. and Doctoral Programs

- **Business and Commerce**
  - Master’s and Doctoral Programs
  - Global Innovation Design Program

- **Law School**
  - Master of Laws (LL.M.) in Global Legal Practice

- **Medical**
  - Doctoral Program

Non Degree Programs

- **Japanese Language Program (JLP)**
  - Acquire advanced technical proficiency in Japanese alongside the skills to become one of the "Japan hands" of the future
  - A range of class levels available to study the Japanese language and Japan
  - Design the curriculum aligned to your Japanese proficiency level

- **Economics**
  - Sciences Po (France)
  - Bocconi University (Italy)
  - ESSEC Business School (France)

- **Business Administration**
  - ESSEC Business School (France)
  - WHU Otto Bussheim School of Management (Germany)

- **Media and Governance**
  - Fudan University (China)
  - Wuhan University (China)

- **Human Relations**
  - University of South Australia (Australia)

- **Law School**
  - University of Washington (U.S.A)
  - University of South Australia (Australia)

Short-Term Programs

- **Keio Summer Program**
  - A two-month program (June – July) to study and experience life in Japan
  - Offers opportunities to take Keio’s credit-bearing courses while studying side by side with Keio students

- **Keio Short-Term Japanese Studies Program (KJSP)**
  - A two-week intensive program to better understand Japanese society and culture
  - International students study side by side with Keio students who also take part in the program
  - Suitable for undergraduate and graduate students who are new to Japan and its language
  - For students of Keio’s student-exchange partner universities and APRU member universities

- **Thesis@Keio**
  - Provides valuable opportunities to build an international academic network
  - Supports aspiring researchers from overseas in deepening their knowledge
  - For a period of 7-89 days
  - For graduate students enrolled in overseas universities

As of April 2019
A program conducted exclusively in English to foster diversity and deepen specialist knowledge

GIC (Global Interdisciplinary Courses)
A program which aims to foster international and interdisciplinary personnel. All undergraduate students can attend. A Certificate of Completion will be awarded to those students who have acquired a set amount of credits for classes taken in English (or other foreign languages). There are two types of courses: core courses (basic subjects) and research courses (specialist subjects) with a total in excess of 500 courses offered.

PCP (Professional Career Programme)
A program in which all aspects including classes and examinations are conducted exclusively in English. Only third and fourth year level students at the Faculty of Economics who satisfy prescribed grade levels and English language proficiency can attend. Participants will learn about basic economic principles and quantitative analysis techniques and bolster their research skills through joint and individual study. A Certificate of Completion will be awarded to all those who attend the prescribed number of PCP classes and above. This program will help to cultivate personnel with advanced practical and research abilities capable of being active on the global stage.

GPP (Global Passport Program)
This is an elective program provided in English for third and fourth year level undergraduate students which aims to foster the capacity to identify and find solutions to various problems which directly confront corporations and organizations in global society while mobilizing the resources and strengths of the Faculty of Business and Commerce. The curriculum is characterized by the three qualities of highly specialized coursework, workshops which emphasize the merging of theory and practice, and activities which facilitate the acquisition of hands-on know-how.

International Center Courses
Classes are held entirely in English with integrated content centered on core themes which include culture, the arts, history, politics, economics, and law as they relate to Japan, East Asia, and Southeast Asia. It was instituted as an opportunity for Japanese and international students to study together. It is an opportunity to mutually enhance capacities on the multilateral fronts of Japan and Asia through exchanges of diverse values and opinions in English.
From tradition to innovation, rich and diverse range of learning opportunities showcases the strengths of Keio as a comprehensive university

Bachelor’s Program

Professional Degree Program

Law School
- Major in Legal Practice: Juris Doctor
- Master of Laws (LL.M.) in Global Legal Practice: Master of Laws (LL.M.)

As of April 2019
On- and off-campus learning creates a fulfilling student life

Faculty of Economics

Minyoung Lee (from South Korea)

Being enrolled at the Faculty of Economics, I spend a lot of my time on Mita Campus. I often use the Media Center where I can find all kinds of texts and materials, and I often go to the Global Lounge to interact with other students from all over the world. I am currently job hunting, and I am very grateful that I can get a lot of valuable information on campus.

Highlights of a typical day

AM 11:00
Taking a class on industrial economics on Mita Campus. These classes, which are held in Japanese, use Japanese companies as examples and I learn things in great depth.

PM 1:00
I have some free time between classes. I go for lunch with friends off-campus or read under the big ginkgo tree.

PM 3:00
Mid-term presentation of my graduation thesis for my seminar. I get a lot of good advice from my professor and fellow students, and soon I will decide on the direction of my future studies.

PM 5:30
Gathering information to help me find a job at the Student Lounge. This is an open space where many students interact daily, so I can also exchange information with various people here.

Graduate School of Media Design (master's program)

Tanner Person (from the US)

I am currently living a meaningful student life doing research in Japan. I go between Hiyoshi Campus, where I take classes, give presentations, and have business project meetings, and Shibuya, where I conduct research in my lab. However, public transportation is great in Tokyo, so it doesn't take long to go from Hiyoshi to Shibuya. For me, it is an ideal situation for my research.

Highlights of a typical day

AM 10:00
Away from my desk at university and at my laboratory in Shibuya. I am absorbed in my research.

PM 9:00
Taking a break at a cafe on the first floor. Many creators come to this cafe so I'm always inspired.

PM 1:00
Checking the VR program I've been working on for my thesis. I pay close attention to details in the music, graphics, and movement to fine tune the user experience.

PM 5:00
On the 30-minute commute from my laboratory in Shibuya to Hiyoshi Campus. Once there, my fellow laboratory members and I will make presentation materials for the next class.
Rewarding activities at one of the many clubs and circles, with like-minded friends

American Football Team
Wrestling Club
Sailing Team
Piano Club
Cricket Club
Chess Club (KUCC)
Fall Festival Planning Committee
Rover Crew
Shibadalmon Tea Ceremony Society

Be part of the Keio tradition and spirit with events across all four seasons

**Entrance Ceremony**
Orientation
Classes begin for Spring Semester
Course registration
Keio Foundation Day (April 23)

**Tanabata Festival**
(Shonan Fujisawa Campus)
Semester-end examinations for Spring Semester
Summer break

**Commencement Ceremony (September)**
Entrance Ceremony for September entrants
Orientation
Classes begin for Fall Semester
Course registration

**Waseda-Keio Baseball Games**
This is a traditional match between Keio University and Waseda University that began in 1903.
Support the team and experience a sense of unity with the Keio community.

**Yagami Festival**
(Yagami Campus)
SFC Fall Festival
Shiba-Kiyosumi Festival
Shiba-Kyoyaku Festival
Waseda-Keio Baseball Games

**Yotsuya Festival**
(Mita Campus)
Waseda-Keio Baseball Games

**Mita Festival**
One of Japan's largest school festivals punctuated with well-planned academic-related events, and seminar classes and student clubs present some of the results of their daily activities.

**SFC Fall Festival**
(Shonan Fujisawa Campus)
Mita Festival
(Shonan Fujisawa Campus)
Waseda-Keio Baseball Games

**Winter break**

**Anniversary of Yukichi Fukuzawa's Birthday (January 10)**
Semester-end examinations for Fall Semester

**Spring break**

**Commencement Ceremony**
Graduates can often be seen attired in kimonos, and also attired in the traditional costumes of their home countries.

*Events and schedules may vary.*
Ensuring peace of mind when you arrive in Japan
Experience the comforts of everyday life at the student dormitories

Hiyoshi International Dormitory

- Dormitory rooms with 4 persons per unit, made up of 2 Japanese students and 2 students from overseas
- Each unit has 4 private rooms and communal areas comprising a living room, shower room, toilet and wash basin
- With ample space in which to interact with other students including the communal kitchen and Assembly Room

Tsunashima Student Dormitory

- All single rooms, fully equipped with amenities, including a wash basin and bathroom ventilation fan
- Lifestyle support by the dormitory heads and their spouses who also live in the facilities
- We proudly supply safe and delicious evening meals and breakfast
Renting private accommodation is another option for students. As it is not common to share a room or a house in Japan, most students who choose to do so rent a single room. Please refer to the website below for further information about student housing.

The currency of Japan is the Japanese yen (¥). There are various denominations such as the three paper notes of 10,000 yen, 5,000 yen, and 1,000 yen and the 500 yen, 100 yen, 50 yen, 10 yen, 5 yen, and 1 yen coins. While cash payments are standard practice in Japan, credit cards are accepted in many stores and it has recently become possible to shop using IC cards, even in convenience stores, in addition to their use on public transport.

Our Alumni—From Keio to the World

Graduated from the Graduate School of Economics
Piotr Kroujkov (from Russia / France)

Making use of what I learned at Keio in my work

After coming to Keio as an exchange student, I came back to Tokyo to do an internship at All Nippon Airways Co., Ltd. (ANA) at the recommendation of a professor. It was the first time for me to work at a Japanese company, but I really enjoyed it. Even after the internship, ANA continued to support my research and I started working there while still a student. The quality of life in Tokyo is good, and it is a unique and beautiful city bustling with excitement. Life here is so great that I chose to stay and work in Tokyo after graduation. I continued working at ANA, in their marketing communication division, planning activities for the European market. When I want to know if the communication activities we carry out are effective, the research in economics I did at Keio and the data analysis methods I learned continue to be very useful. As we understand more about people and their actions, and that of companies and markets, we can see how small behavioural interventions can influence the actions of a large number of people. I find this very interesting. This kind of work is now usually done in the field of marketing communication, but my goal is to positively affect people beyond that. For students who are thinking about studying in Japan, I think the most important thing is to not build walls. You will have a more exciting experience by taking on many challenges.

Graduated from the Faculty of Business and Commerce
Namhee Kong (from South Korea)

My career is supported by my “connections”

For me, Keio University was a place that allowed me to focus on the road I wanted to take. It was a place that offered a lot of freedom while fully supporting me whenever I set off to learn something. After graduating, I went back to South Korea and got a job at a Japanese construction company. After three years there, I began to want to work more globally, so I started to look for jobs in Japan and Singapore. The really great thing about being a Keio Alumni while I was job hunting was the Mita-kai* network that exists all over the world. The chairperson of the Singapore Mita-kai introduced me to local companies. Singapore is a global country, but I felt stronger about the potential in the Japanese market, and finally decided to move to a global company in Japan. Tokyo is a city that fuses retro with digital, and is the coolest city in the world. I am very proud to work in this city.

In the future, I want to work in Shanghai where our Asia base is located, and then in Sweden where our head office is based. Every day I am working hard to achieve these goals and I’m sure my Keio network will be a great asset going forward. I will always cherish my ties to Keio University.

My career map

2007
Entered Keio University’s Faculty of Business and Commerce
Studied organizational culture theory and econometrics
2013
After graduating, I joined a Japanese construction company in South Korea
Worked as a project engineer
2016
Job hunting in Japan and Singapore
2017
Joined a global manufacturer in Japan
Working as a sales engineer
Goal in 5 years
I want to work in Shanghai, and the head office in Sweden!

* See page 41

My career map

2010
Entered Toulouse School of Economics
2013
Came to Keio University as an exchange student
2014
Entered Sciences Po and the Ecole Polytechnique
Studied economics, game theory, and decision theory
2015
Did an internship at ANA
Came to Keio University’s Graduate School of Economics on a double degree program
Studied behavioral economics and lab analysis
2016
Joined ANA, working in the marketing team
Graduated from Keio University’s Graduate School of Economics
Goal in 5 years
Change the world through marketing communication!
Mita-kai Alumni Network

Alumni of Keio University are called “Jukuin.” Most of the 370,000 alumni of our university continue to hold dear the bonds they have formed at Keio.

Mita-kai are independent, volunteer-run groups which bring together Keio alumni. Mita-kai take the form of clubs, societies, and seminars arranged around different themes, such as the yearly Mita-kai open to those graduating from Keio in a particular academic year, and the regional Mita-kai established in various regions in Japan and abroad. There are also Mita-kai by place or industry of employment for those in particular corporations or fields.

There are around 800 Mita-kai in Japan and around 70 overseas. They are a platform for exchange and continued friendship among Keio alumni.

Jukuin throughout the globe get together and engage in a variety of activities, including supporting the students currently charting their way in various fields.
